

15. Project Management

Every manager and staff member should have the ability to run a great project. There are a small number of very important matters that every Project Manager should be aware of. This Skillpod covers all the basics that your managers and staff need.

Making a Plan

This Skillpod will ensure that your managers deliver well-executed projects that are on time and on budget.

Before, During and After

Good project management starts well before the project starts, keeps the project going through that often-difficult middle stage and keeps a firm eye on the outcome that the client and/or organisation needs. We will address all of these stages.

Contact lene@netvigator.com to help your staff master this skillset.

“Lene expresses her technical knowledge in the form of focused, accessible suggestions.. that will make the biggest difference”

Dr Rob Purves,
Barrister
